NEW YORK 1, N. Y.

FOREWORD

The Alcoa Extruded Aluminum shapes and miscellaneous aluminum, Tubing, Pipe, Castings, etc. shown on the following pages represent possibly the largest offering of **Architectural Aluminum** available from warehouse stock.

Of the many new designs added to this Catalog, we want to draw particular attention to the ornamental aluminum castings shown on pages 10 to 15 inclusive. They have been carefully designed and are especially suited for Railings and Trellis. They are light in weight, double faced, and all authentic details have been retained.

Although many new items are shown, we can also supply additional shapes from open mill dies or from dies made for customers exclusive use. There is a nominal charge for special dies.

The designs illustrated are carried in lengths and alloys best suited to their particular use. This information is shown in numerical index on following pages. The illustrations are generally shown in full size but are subject to variation and revision from time to time.

We solicit your inquiries and suggestions.

ALPHABETICAL INDEX

ALCOA COPINGS & GRAVEL STOPS

27

On the following pages we offer an entirely new aluminum service from stock. Extruded Aluminum Copings and Gravel Stops are supplied complete with all the necessary anchor plates, sheet, joint cover plates, strap anchors, nails, washers, etc. to finish a complete job.

Extruded Aluminum Copings and Gravel Stops are watertight, light in weight and offer an inexpensive installation with a minimum of time and labor. Can be assembled almost entirely on the job and are equally well suited for new work or for replacements. Complete details for installation and specifications will be found on the following pages.

The light weight of Extruded Aluminum Copings and Gravel Stops make them easy to handle as they weigh only a fraction of stone or terra cotta. Transportation and labor costs are greatly reduced as no special conveying or hoisting equipment are necessary.

The following complete materials are furnished for each job.

FOR COPINGS

EXTRUDED ALCOA ALUMINUM FASCIA 36723 is supplied in straight 10 ft. lengths.

SUFFICIENT No. 36724 EXTRUDED ALUMINUM Joint Cover and No. 36725 Extruded Aluminum Anchor Plate are supplied to cut all the 6 inch pieces necessary to complete job.

SUFFICIENT ALUMINUM SHEET of .064 and .032 thickness will be supplied to make the desired width of coping sheets and joint covers. The Aluminum Sheet will be supplied flat, to be shaped by installing contractor to meet existing conditions.

WELDED CORNERS, both inside and outside can be supplied, if desired, in accordance with customers drawings and specifications. These will be subject to our approval.

Sufficient Aluminum Nails, Electro Galvanized bolts, Nuts and Washers will be furnished to fasten Copings.

FOR GRAVEL STOPS

EXTRUDED ALCOA ALUMINUM GRAVEL STOP. No. 39259 is supplied in straight 10 ft. lengths.

Sufficient No. 39258 Joint Cover Plate is supplied to cut all the 6 inch pieces necessary to complete job.

Sufficient Aluminum Nails with Neoprene Washers will be supplied to fasten Gravel Stop and Cover Plates.

WELDED CORNERS, inside and outside can be supplied, if desired, in accordance with customers drawings and specifications. These will be subject to our approval.

Complete working details and specifications for both Copings and Gravel Stops will be found on following pages.

SCALE — HALF FULL SIZE

This type of Coping, which combines an Alcoa extruded shape with formed sheet aluminum, is adaptable for walls of any thickness or material. The extruded shape may be purchased cut to specified lengths and requires very little shop fabrication.

The Coping Sheet proper and Joint Cover Sheet can be readily and accurately formed by any well equipped fabrication shop. The result is an economical and watertight custom-built coping designed for the structure on which it is used.

SPECIFICATIONS

EXTRUDED SHAPES

*63S-F

Extruded shapes shall be Alcoa Aluminum alloy ★, as extruded, Federal Specification QQ-A-356b, Condition F. The extruded Coping shall be not less than 0.093 inch thick; the extruded Expansion Joint Cover shall be not less than 0.050 inch thick.

Extruded shapes shall have smooth, clean, sharp profiles, true to details, dimensions, design requirements and unless otherwise noted, shall be straight and true to line, and shall conform to Alcoa standard tolerance for extruded shapes.

Extruded shapes formed to curve shall be true to radii and free from buckling, kinking or twisting. Certain or all shapes shall be made with miters, slots, plain or tapped holes as required for assembly.

SHEET ALUMINUM

Aluminum sheet shall be Alcoa Aluminum alloy 3S, 1/2 H temper, Federal Specification QQ-A-359a, Condition 1/2 hard. The Coping sheet shall be not less than 0.064 inch in thickness; the Sheet Joint Cover shall be not less than 0.032 inch in thickness.

Sheet Aluminum shall be formed to details, dimensions and design requirements as shown on the drawings and, unless otherwise noted, shall be straight and true to line.

Sheets formed to curve shall be true to radii and free from buckling, twisting or kinking, and made with miters, holes and crimps as required for complete assembly.

Sheet coping sections shall be furnished in lengths not to exceed 10'-0".

EXTRUDED ANCHOR PLATES

Anchor Plates shall be Alcoa Aluminum alloy ★, as extruded, Federal Specification QQ-A-356b, Condition F; formed true to detail, and having a minimum thickness of 0.125". Formed sheet strap anchors shall be 3S, 1/2 H alloy not less than 0.064 inch in thickness.

NAILS

Nails for securing strap anchors shall be aluminum or galvanized steel roofing nails.

0.032" Alcoa Sheet Counter-flashing Built into Masonry Joint

0.032" Alcoa Sheet Combination Base Flashing and Joint Cover Welded or Brazed along Intersection

0.032" Alcoa Sheet Joint Cover — 6" Long

Wall Plugs Built into Masonry

Mitered Corner, Welded or Brazed

No. 36724 Extruded Alcoa Fascia Joint Cover Plate (in Temporary Position)

No. 36723 Extruded Alcoa Fascia, 10'-0" Long

$\frac{3}{8}$ " Galv. Steel Anchor Bolts Built into Masonry, 5'-0 $\frac{1}{8}$ " c. to c.

No. 36725 Extruded Alcoa Anchor Plate, 6" Long

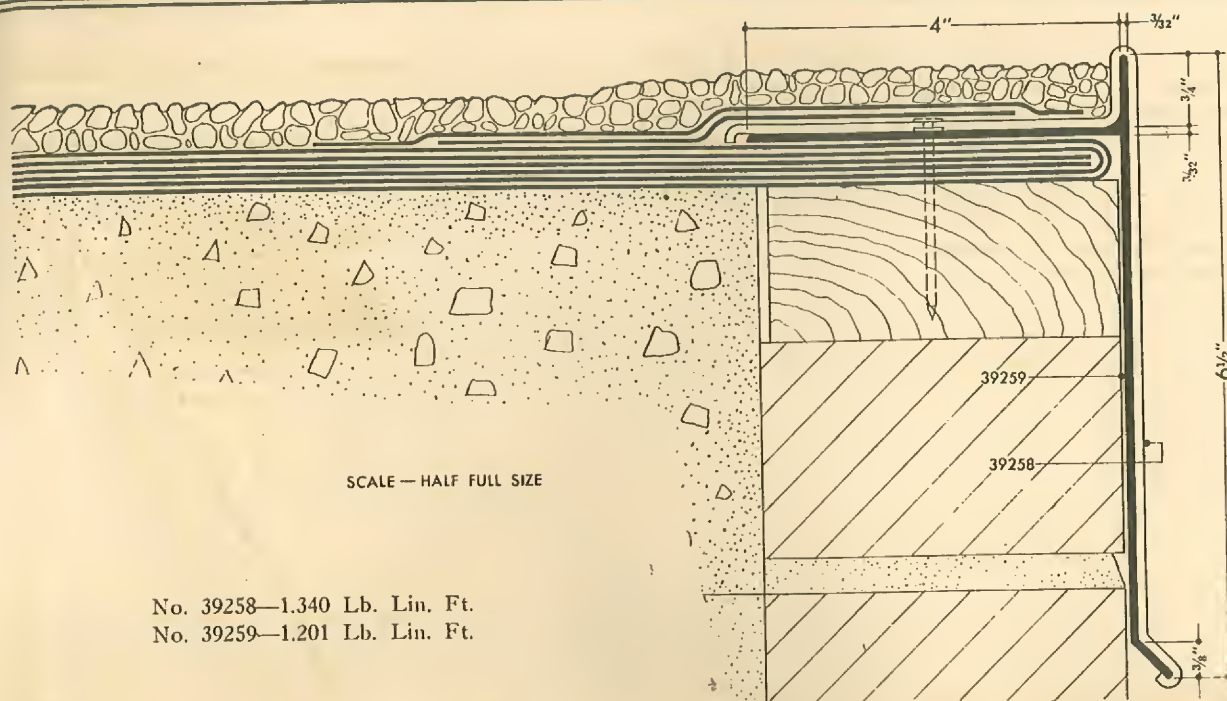

INSTALLATION IS SIMPLE

1. Work from the corners;
2. Nail Strap Anchors in place;
3. Place 10-foot section of Extruded Copings;
4. Slide on Extruded Expansion Joint Cover to clear joint;
5. Insert Anchor Plate;
6. Slip next 10-foot section of Extruded Coping under Anchor Plate, allowing $\frac{1}{4}$ inch between sections for expansion;
7. Place anchor washer and nut and tighten;
8. Place bed of bituminous mastic on top at ends of Extruded Copings at expansion

joints and slide Extruded Expansion Joint Cover over joint;

9. Place bed of bituminous mastic on top at ends of Coping Sheets at expansion joints and hook Coping Sheet under Extruded Coping. Snap drip edge into place over Strap Anchors.
10. Hook Sheet Joint Cover under Extruded Coping at expansion joints and snap drip edge into place over Coping Sheet.
11. Caulk at joint between Coping Sheet and Extruded Coping.

The use of this Alcoa Extruded Gravel Stop with its Joint Cover Plate gives a positive water-sealed unit at minimum cost. Installation of this unit is accomplished by driving one nail in the

center of each length and one through the Cover Plate at each joint.

This Gravel Stop was designed especially for use with bonded roofing.

*635-F

EXTRUDED SHAPES

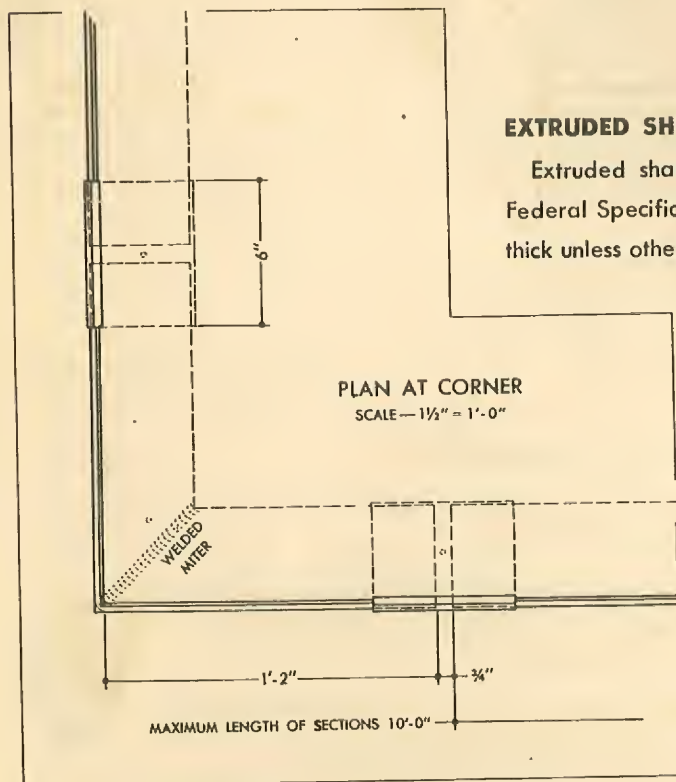

Extruded shapes shall be Alcoa Aluminum alloy *, as extruded, Federal Specification QQ-A-356b, Condition F, not less than 0.093 inch thick unless otherwise specified.

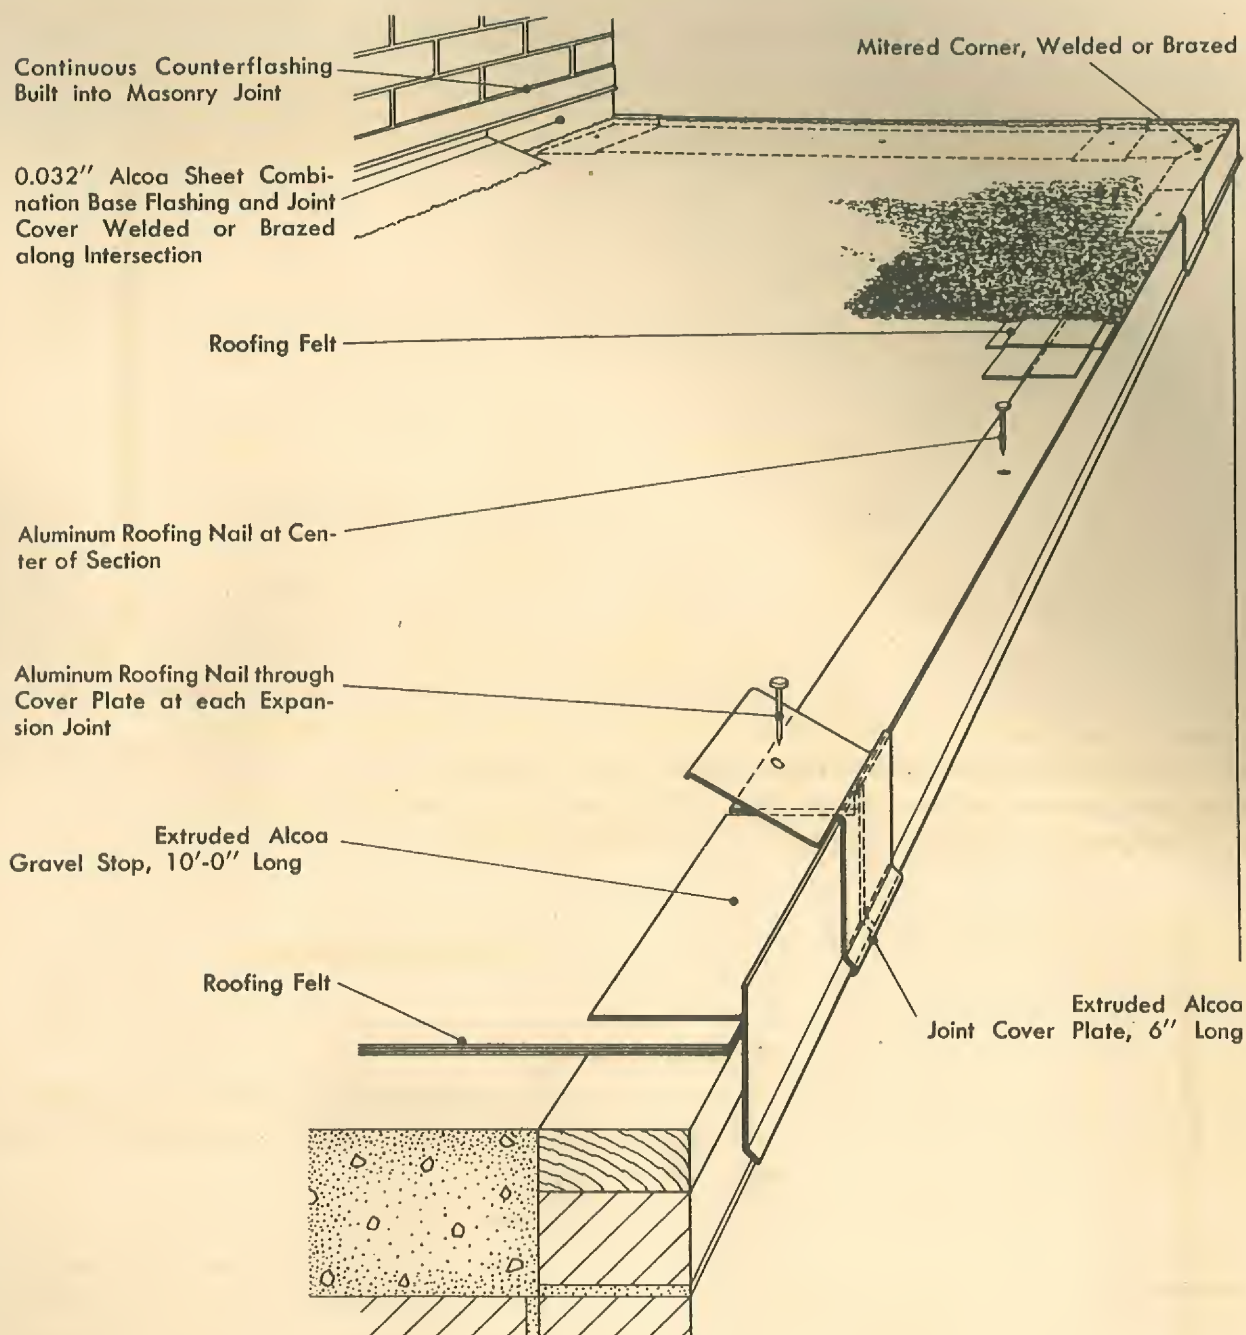

Extruded shapes shall have smooth, clean, sharp profiles, true to details, dimensions, design requirements and unless otherwise noted, shall be straight and true to line, and shall conform to Alcoa standard tolerance for extruded shapes.

Extruded shapes formed to curve shall be true to radii and free from buckling, kinking or twisting. Certain or all shapes shall be made with miters, slots and holes as required for assembly.

NAILS

Nails for securing gravel stop sections and cover plates shall be Aluminum roofing nails.

INSTALLATION IS SIMPLE

1. Work from the corner;
2. Place 10-foot section of Extruded Gravel Stop;
3. Nail at center only;
4. Slide on Extruded Joint Cover Plate to clear joint;
5. Place next 10-foot section of Extruded Gravel Stop, allowing $\frac{3}{4}$ " between sections for expansion and nailing.
6. Slide Extruded Joint Cover Plate over joint on bed of bituminous mastic and nail.

STANDARD ALUMINUM PIPE 63-ST-5 ALLOY

AVAILABLE IN THREE SIZES

1" I.P.S.

1¼" I.P.S.

1½" I.P.S.

Supplied in 12 Foot Lengths

STANDARD ALUMINUM, fittings and pipe are ideally suited for Hand Rails, Guard Rails, etc., etc. They are highly resistant to corrosion, durable and leave no streak or stain on adjacent surfaces.

ALUMINUM FITTINGS FOR RAILINGS

AVAILABLE FOR ¼" AND ½" ALUMINUM PIPE

FLUSH TYPE

ELL—90°

FACIA FLANGE

HANDRAIL
TERMINAL

CROSS

TEE

FLOOR FLANGE

PIPE RAIL BRACKET

No. 4593

2½"

FLUSH TYPE FITTINGS, are clean, strong and fit perfectly with outside surface of Aluminum Pipe. Only a thin seam is visible between pipe and fittings. All fittings are cast aluminum alloy B-214, except floor flange and fascia flange which are forged aluminum, alloy 61-ST.

RAILINGS, made from genuine aluminum pipe and fittings are long lasting with a minimum of maintenance. Pipe and flush type fittings are fastened together with pins or weld. Other fittings for stair rails in 35° or 40° angles are available on special order. Ask for full information.
